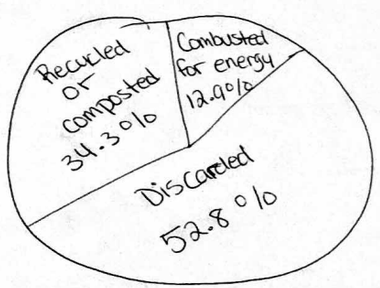
SBA EARTH DAY POSTER

• We should reduce, reuse and reycle because. We would make the earth more Cleaner. For example when we reycle bottles, etc we save energy. Also reycling helps us to Convert our old products into new useful products. In other words it is good for the enviroment. Since we are saving resources and are sending less trash to the landfills, it helps in reducing air and water pollution.

• The way how people can reduce, reuse or reycle is. By having [redacted] seperate bins that are labeled recycled bins (etc.) and everytime a person is finished drinking a water bottle they can throw the bottle into the recycling bin. Or they can have a plastic bin and a glass bin. So that they are saving energy. When you recycle, reuse and reduce it helps the earth by. Saving on energy needed to melt the glass. Glass produced from recycled glass reduces related air pollution by 20% and related water pollution by 50%. Recycling glass reduces the space in landfills that would otherwise be taken up by used bottles and jars.



Reduce, Recycle, Reuse .....

Please reduce, recycle, reuse,
You can help the earth if you choose,
Recycle plastic, glass and cans,
Reduce the rubbish on our lands

Reduce
to use less of something.

Reuse
to use an item again.

Recycle
to make new items from old ones.
