Frederick Leighton Elementary – 4th Grade
Oswego, NY

Alexa Kuzawski

What are you thankful for this year?

I am thankful for my family and friends. I am thankful for these very important and intellegent people because they love me. My parents buy the food I eat, and they pay for the house I live in. My brother and sister always play with me. My friends always have my back.

I am very thankful for my food. Without food and water I couldent live. Some foods I dont really like, but I dont mind alot of them. Without food I wouldent be big and strong like I am now. When I get hangry sometimes I get angry.

Lastly, I am thankful for school. Without school I would have never met my friends and I would never learn. I wouldn't know anything. I wouldn't have ever learned anything like science, social studies, math, ELA, reading or I wouldn't be writing this. I need to know this stuff because all of these things are life. I love all of these subjects, without school I wouldn't know anything about these subjects. School is a great place. I love school. We do many fun things, and we do hard things. In conclusion, I am thankful for my family, friends, my food, and my school.
