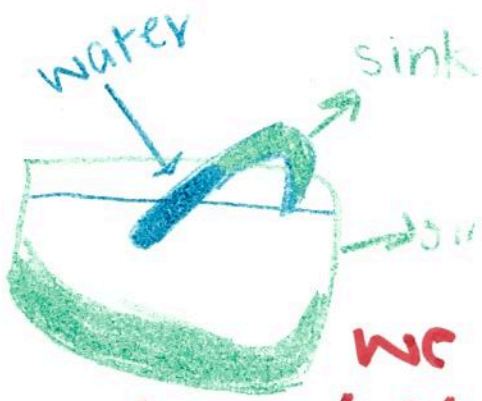
Save the Energy

We can save a lot of energy together!

Turn the sink off when you are done!



Using computers and smart boards less can help conserve electricity!

So: What are we waiting for? Lets Go!

We just need team work!

Water is a type of energy too you know!

There is a force that pushes water through. This is one type of energy

Turning of lights help too!

Light uses electricity and electricity is also known as a main source of energy.

→ light bulb/idea

Schools should try to open windos for light instead of always using electricity!

It could be really cool with windos open!
