

## **What are you Thankful For?**

I think I am thankful for a lot of things and people. To be thankful is something very important in life.

First of all, and the most important, I am thankful for my family members. Family is the most important thing in life. My family loves me and I love them back. They love me, play with me, care about me, and sometimes entertain me. I love my family a lot.

Also, I am thankful for my friends. My friends help me in school, play with me outside, they play with me video games and a lot more. I like my friends a lot. Me, and I think everyone in this world, would not be able to live without friends.

I am also thankful for my school. In school, I meet friends and learn. My school educates me very well. I like my teachers. School is very important. We would not know anything without school.

In conclusion, I am very thankful for a lot of things and people.
