Accomplishing My Dancing Scholarship

Back in 2008 my parents decided to join me in a dancing school. From since then till now I have been dancing with the help of my parents. They have been taking the time to carry me to and from dancing.

With all the hustle and bustle it has paid off because I accomplished a dancing scholarship. I like this scholarship because it makes me more active and it relaxes my mind from a long day at school. I learn Ballet, Jazz and Tap. My favorite dance is Ballet because it calms my body. In the future I see myself as a professional ballet dancer.

Achieving this scholarship show that hard work pays off. It allows me to help other students and for them to help me. Accomplishing this scholarship makes me work harder so I can always be an achiever. I am thankful for the help of my parents because without them achieving this scholarship would not have been possible. Also, I am thankful for the lessons from my dancing teachers.

In conclusion, I would advice my fellow friends and classmates never to give up. I know that 2011 has been a successful year and I will continue to work harder for the upcoming years. I am thankful for my achievement, and know that in the future it will make a huge difference.
