What I am Grateful For

There are many things I am grateful for. The reason I am grateful is because there are many less fortunate people in the world. Some things I am grateful for are the food on my plate, and a roof over my head. Another few things I am grateful for is the loving parents I have, and the chance I get for an education.

The reason I said I'm grateful for food my plate because some people do not have enough money to provide food for their families. Also, some people's parents died from diseases or for many other reasons and the people are so they can't provide for their families. Also, I said I am thankful for a roof over my head is because some people do not have jobs so they can't afford to rent, or buy a house. Sometimes shelters are full and won't take anyone else in so they end up sleeping in the roads.

I said I am thankful for loves parents because some parents cannot care for their children or are in jail so they can't provide for their families. Also, sometimes parents get fed up with the child's badness and kick them out and never want to see them again. Lastly, some kids live on farms and live too far from a school so they don't have a chance furan

education. Also, they would need to help with the profits on the farm and they would not be able to go to school.

In conclusion, the lesson I learned from this is to be grateful for what you already have and not some gadget you want. Don't waste food because someone else might need it. Next, time you get mad at your parents, think of the less fortunate children. Lastly, focus on the positive things and not the negatives because life is too short to always be mad.
