Mr. Gordon writing

There are many things I am thankful for, especially around this time of year. I love celebrating Thanksgiving with my family and enjoying all the foods we eat. I am grateful for multiple things like, my friends, my family, my teachers, and so much more!

I am mostly thankful for my mom because she loves me and my two brothers so much and I know she loves us for being good everyday. We never misbehave and are always super kind. I love my mom for everything she has done for me, Noah, and William. My two brothers and I have the best mom ever!

I am also grateful for plants. I am thankful for plants because plants are very important to the environment. If plants didn't exist then we wouldn't exist and without plants we wouldn't be able to breathe which means we wouldn't have any oxygen. I am so happy that we have plants because without them there wouldn't be any of us.

I am so glad that my mom is alive and that plants exist. Without these two things I wouldn't even exist. I hope plants live forever

and I know my mom will always be there with me. I hope this lasts forever!
