I am Thankful for My teachers

I am thankful for my teachers. They help me learn new things so I can get good grades. These are some of the things I learned: In math I learned multiplication, in social studies I learned about Native Americans, and in computers I learned how to type.

If I need help my teachers are there for me.

My teachers are very nice and that's why I am thankful for them. Maybe they are thankful for me. I'm glad that I have a teacher because when I grow up I want to be one.

I'm thankful for the work that they give me. I am thankful for my teachers.
