Thankfulness Essay

This year I am so thankful that I have friends and family as great as they already are. I could not ask for better friends or family. My friends' names are Ali, Bethany, and Morghan. I have many more friends but these are the best ones. In my family there is my mom, named Julie, my dad Mike, and my sister Zoe. I love them so much.

Family means everything to me. They help me with work for example, when I can't figure out a problem they just walk me through it. They help me get through things such as reading things out loud when I don't want to. They are so nice!!!!!!! Sometimes there mean but there just joking. I love my family and they are so important.

My friends are the next greatest thing in my life. They always support me one example is they encouraged me to do basketball. They help me as much as they can. They help me with homework. If I mess something up they help me fix it, like the time I messed up putting an essay together they helped me fix it. Friends are great and helpful.

I love my friends and family. They are a great help and I think they're the greatest. They love me and I love them. We help each other and we work together. This year I was closer to them than I ever been. I am so thankful this year for my friends and family.
