Thankful

I am thankful for my mother because she gave me life. I am thankful for my father. He's been there for me all the time and always will. I am thankful for my family. My family helps me in my life. All they want is for me to be happy. If I'm not happy, I tell someone what my problem is and they will help me solve my problem. I am thankful for friends because when someone upsets me, my friends are always there for me. When my friends get upset I'm there for them, too. I am thankful for teachers because they teach me things that I don't know. They give me a good education. I am thankful for jobs. They give people money so they can take care of their families and pay bills. I am thankful for builders because they build everyone houses where we live. I am thankful for super markets. They sell the food or ingredients we need so everyone can eat. I am thankful for water because water keeps people alive.
