Ms. Miller

I love my family and my friend Hannah is like my sister and I'm thankful that I have them. My family and Hannah have done so much for me and I'm thankful they are alive. These are things they do that make me happy and why I'm thankful for them.

I have known my family ever since I was born and I'm glad they are my family and always will be. If my family was not here, I don't know who would watch over me. If my family was not alive, no one else I know of would spend so much time with me. If my family was not with me, I don't know who else would love me as much as them. When my parents are not here, my grandma watches over me and my brother. I am always with my family but I rarely spend time with any friends but Hannah. My family always kisses me and hugs me and tell me they love me.

I have known Hannah since 4th grade and I'm so happy today that I met her. I don't know who else's house I would sleepover at. Hannah keeps me company after school at my house. She takes me to the mall or movies if I'm bored. I have not had a sleepover at any other friend's house for a long time. She comes over almost every day. When I call she asks if I'm bored and says "let's go somewhere".

My family and Hannah have done a lot for me and I'm lucky I know them because Hannah is really nice and so is my family.
