ELA
Ms. Miller

My parents are my most important family members. My parents are my favorite family members because they care a lot for our family. My mom and dad work a lot. They will always love me and I will always love them.

My parents are my most important family members. My parents are important to me because they feed me; they feed me so I won't starve. Also they give me what I want and need because they wish the best for me. They work to help me succeed in life so my parents won't give up on me. My parents show me a lot of appreciation. My parents are my most important family members.

AAU basketball is my favorite sport and favorite thing to do for free time. Basketball is my favorite sport because our coaches practice with us so we can get better and because we want to win and be successful in the game. The organization gives us T-shirts and food and also team uniforms sponsored by Nike. AAU Basketball is very fun.

When I got called from my coach in AAU basketball it was an opportunity, having my parent for your whole entire life is 1-100 times that's how valuable they are to me and being on that team is a chance that is hard to get. And that's why i'm thankful for those things.
