ELA  
Ms. Miller

Have you ever thought that your parents and siblings are unfair then look though the chores and the knuckle sandwiches? See what they do for you that help you. My mom and dad do a ton of things to support me. My 14 year old brother Hayden and my 8 year old brother Cole believe it or not help me a ton also.

My parents are kind and loving so I appreciate them. My mom and dad always see the brighter sides of things. When I lost my last football game they said I would not have to lose in a year. Also my parents study with me and help me with school work. Even though my family is a sports family they support my art by going to my art shows. I am thankful for them for more reasons because there the best.

My brothers are the best because one is older and one is younger so I am not to small but not to big. I am thankful for them both. When I need help with my chores I can count on my brothers to help me out. I will never be board because I can always count on them to play with me. Also my brothers can teach me things. I can always count on my brothers no matter what.

My family members are the best and I love them. My mom and dad know just what to do. My brothers are the same way {even if they are annoying.}
