Thanksgiving Essay

Dr. Mayerson

On Thanksgiving we celebrate what we are thankful for and we should be proud for what we have. But some people in the world don't always have what they want or need.

What I am thankful for mostly is my family because without them I wouldn't be able to learn and discipline myself, and when I come home my mom always makes dinner for me. Some kids in the world don't even have food, not even well cooked food and they have to starve everyday and wait for someone with a heart to feed them that's why I am thankful for my family. Because they have given me everything I've wanted and needed.

I am also thankful for my health and that if I get sick could go to the doctor right away and get treatment, and receive medicine right away. Or if I got in a serious injury I would be able to go to the hospital and get surgery and or whatever I needed. Some kids in the world don't even have doctors around and they suffer and they could die without treatment or it would be even worse if they got a serious injury they would suffer even more and could go through a painful death.

Also I am thankful for my education that I have because I could go to school everyday, and I would have teachers that would teach me something new everyday and would be able to spend time with my friends and I would be able to have everything I need to use in school, and we have lunch we can eat. Even some kids in the world have

some of these things but then it gets taken away from them and sometimes it gets even worse when their whole entire education taken away and don't anything, and I am very thankful that I have an education.

I am very thankful for everything I have and I am very thankful to have a family that cares and loves me and wants to share a great time on Thanksgiving and my family is thankful to have me to love them.
