

What would you say if someone asked you what you are thankful for this year? I know it's hard for some easy for others and some are ok right in the middle. Well it's easy for me because I have lots of things I'm thankful for and you will find them out if you read my story.

I am thankful for having responsibilities like watching my little siblings with my two brothers because I get to spend time with my siblings. I'm also thankful for being able to handle my own money because I get to buy the things I want. I'm also thankful for having friends and sports like football, baseball and hockey because they are lots of fun to play with and sports are lots of fun to watch and play. I am also thankful for having for my family and health because they help me out a lot. I am also thankful for holidays like Christmas, Thanksgiving, Halloween, 4th of July, April fools, St. Patrick day and New Years day because I get to be with my family on the holidays and I like being with my family. I am also thankful for electronics and food and water because the electronics are fun and food and water keep me alive.
