

Brooke Roff

I am thankful for my house because that protects me and I have a place to sleep. Having a house means I have a place to live. I'm thankful also for my house because my mom and my dad and my brother live there so I'm not alone. If I were alone I would be scared. What I really know about my home is that it is safe. I know know one is going to steal me. I think having a house is very important because most of all a house is for family.

My family loves to cook and that is why my mom loves our kitchen. Having a family means a lot to me especially that they live with me. That is the best part.

What I am so amazed by in my house is that my parents can afford it. Also my house is for pets and guests and to play in. My house is beautiful it has a waterfall on the grass in the front. That's why I am thankful for my house.
