Eastman Business Park: Open for Business

I was fortunate to join Lt. Governor Duffy and other local leaders in announcing an exciting new agreement between New York State and Kodak for the Eastman Business Park.

This agreement will help attract new businesses and bring more jobs to the Rochester region. I'd like to personally commend everyone that was involved making this agreement happen—from my partners in government, locally and at the State level, to those involved in the Finger Lakes Economic Development Council and of course, Kodak.

This is an exciting time for Eastman Business Park; it truly is a one of a kind facility, unlike any other in the entire nation.

Cutting the Red Tape to Create Jobs

My colleagues in the New York State Senate and I recently passed 14 regulatory reform bills as the first part of a major initiative to identify and eliminate thousands of costly and unnecessary government regulations. These regulations inhibit job creation and drive up local property taxes.

The package is designed to create a more competitive environment for businesses so they can grow for the future and create more jobs. Unnecessary and burdensome regulations continue to be a major obstacle to revitalizing our State's economy. Less red tape means more jobs.

On Thursday, June 27, I helped welcome Dr. Glen Spinelli, DDS and his staff to their new office at Twelve Corners in Brighton. Best of luck to Dr. Spinelli and the entire team at Spinelli Dental!
