

2023-J2071

Senate Resolution No. 2071

BY: Senator RHOADS

MEMORIALIZING Governor Kathy Hochul to proclaim
May 17, 2024, as Necrotizing Enterocolitis Awareness
Day in the State of New York

WHEREAS, It is the custom of this Legislative Body to recognize
official days that are set aside to increase awareness of serious health
issues that affect the lives of families in the State of New York; and

WHEREAS, Attendant to such concern, and in full accord with its
long-standing traditions, this Legislative Body is justly proud to
memorialize Governor Kathy Hochul to proclaim Friday, May 17, 2024, as
Necrotizing Enterocolitis Awareness Day in the State of New York; and

WHEREAS, Necrotizing enterocolitis (NEC) is the most common cause of
death in hospitalized premature infants after two weeks of age; and

WHEREAS, Babies born prematurely or with a medical complication like
congenital heart disease are most at risk of NEC; and

WHEREAS, Thousands of babies develop NEC each year and hundreds of
babies die from this complex intestinal condition; and

WHEREAS, Necrotizing enterocolitis causes a severe inflammatory
process that can lead to intestinal tissue damage and death; once NEC is
diagnosed, many babies only live for a few hours or days; and

WHEREAS, Surgery for NEC is not curative, and the babies who survive often have lifelong neurological and nutritional complications; and

WHEREAS, Necrotizing enterocolitis results in approximately \$5,000,000,000 dollars of hospitalization expenses per year and roughly 19 percent of neonatal healthcare expenditures in the United States, with an estimated cost of \$200,000 or more for each case of surgical necrotizing enterocolitis; and

WHEREAS, Breast milk is one of the most effective ways to help prevent necrotizing enterocolitis in medically fragile infants, and when the mother's milk is unavailable, pasteurized donor human milk is the next-safest option for babies at risk of NEC; and

WHEREAS, Formula does not protect against the risk of NEC in medically fragile infants, and infants at risk of NEC receive the most protection from their mother's own milk and pasteurized donor milk; and

WHEREAS, Although the risk of necrotizing enterocolitis cannot be fully eliminated and there are not yet sure ways to stop or cure NEC, preventative measures are effective at reducing risks; and

WHEREAS, Parents must be trusted and valued as the most important member of their baby's care team, and healthcare providers should partner with families to provide the best care for infants at risk of NEC; and

WHEREAS, This illness affects citizens across this State and Nation; Stephanie Ruidiaz is one such resident living in Bellmore, New York; she has been a champion for Necrotizing enterocolitis after experiencing firsthand the severity of this condition and after facing a devastating loss herself; and

WHEREAS, She serves on the Board of Directors for the NEC Society, a nonprofit organization which works to eliminate the disease, pouring every ounce of herself into raising awareness of this necessary cause; and

WHEREAS, Necrotizing enterocolitis can develop in both premature babies and babies born at term and more data is desperately needed to better understand how and why NEC occurs in preterm and term infants; and

WHEREAS, Disparities and variation in care lead to Black infants being disproportionately affected by, and dying from, necrotizing enterocolitis compared to white infants; and

WHEREAS, The NEC Society is a 501(c)(3) nonprofit organization founded and led by a bereaved mother from California whose son died from complications of NEC, and the NEC Society is the world's leading charity working to accelerate NEC research, education, and advocacy; and

WHEREAS, To build a world without necrotizing enterocolitis and improve outcomes for infants and families, we must bring New Yorkers together to raise awareness about this devastating neonatal disease; now, therefore, be it

RESOLVED, That this Legislative Body pause in its deliberations to memorialize Governor Kathy Hochul to proclaim May 17, 2024, as Necrotizing Enterocolitis Awareness Day in the State of New York; and be it further

RESOLVED, That copies of this Resolution, suitably engrossed, be transmitted to the Honorable Kathy Hochul, Governor of the State of New York, and the NEC Society.
