WHEREAS, A team of researchers has initiated research on AVM, with the goal of identifying a drug therapy to cure the disease; the objectives of this research include determining the mechanism of progression of AVM in humans, developing tools for testing potential pharmacotherapy, and developing drug treatments for humans living with AVM; and

WHEREAS, Kelleigh's Cause, a not-for-profit organization, has been instrumental in raising awareness about AVM and in raising funds to

support the research and medical treatment of AVM; and
