Charles J. Fuschillo Jr.

Senator Fuschillo Announces Senate Passage of “Complete Streets” Legislation

CHARLES J. FUSCHILLO JR. June 20, 2011

| ISSUE: **TRANSPORTATION**

Senator Charles J. Fuschillo, Jr. (R-Merrick) today announced that the New York State Senate has passed his "complete streets" legislation which would help make roadways safer for all who use them.

The legislation would require all state, county, and local transportation agencies to consider complete streets design principles on all projects which receive both federal and state funding. The legislation was developed in consultation with all interested parties, including the New York State Department of Transportation, the Governor, the Assembly, County and Town Highway Superintendents, and advocacy groups.

"This legislation will help make our roads safer for everyone. Complete streets design principles have been proven to reduce fatalities and injuries. Taking them into consideration on future projects will greatly improve the safety of pedestrians, bicyclists, and drivers. The Assembly should join the Senate in passing this legislation," said Senator Fuschillo, Chairman of the Senate's Transportation Committee.

"Transportation has changed. Not only in terms of costs but of the user. New Yorkers have turned to walking and riding bicycles to save money, reduce their carbon footprint and live healthier lives. It is time our roads reflect this change. This overdue legislation seeks to unite mixed use principles with existing infrastructure to the benefit of both in terms of cost and safety. It's time we plan, design and build for a multi-modal state," said Senator Martin Malavé Dilan (D-Brooklyn), ranking member on the Senate Transportation Committee.

Complete streets design principles are roadway design features that accommodate and facilitate safe travel by pedestrians, bicyclists, and motorists of all ages and abilities. These features include sidewalks, paved shoulders suitable for use by bicyclists, bicycle lanes, share the road signage, crosswalks, pedestrian control signalization, bus pull outs, curb cuts, raised crosswalks, ramps and traffic calming measures designed to allow pedestrian and motor traffic to easily coexist.

A Federal Highway Administration safety review found that streets designed with these features improve safety for all users, enabling pedestrians to cross busy roads in two stages, improving bicycle safety and reducing left-turning motorist crashes to zero.

According to the National Highway Traffic Safety Administration (NHTSA), over 300 pedestrians were killed on New York's roadways in 2009, more than 45 other states. 26 percent of all traffic fatalities in New York State in 2009 involved pedestrians, more than double the national average. Between 2000 and 2009, over 3,200 pedestrians were killed in New York State, according to Transportation for America, a coalition of organizations seeking to improve roadway safety.

Wantagh resident Sandi Vega, whose 14 year old daughter Brittany was killed while walking across Sunrise Highway last September, has been a strong advocate for the complete streets legislation. Mrs. Vega said, "This law would help save lives, improve safety,

and prevent tragedies. Saving even one family from the heartache and lifelong pain that comes with losing a loved one, which my family feels every day, will make this law well worth it. I can't thank Senator Fuschillo and the State Senate enough for making our roads safer for pedestrians, bicyclists, and drivers."

The legislation is also supported by a number of organizations, including AARP, Tri-State Transportation Campaign, the New York State Association of Town Superintendents of Highways, the New York State County Highway Superintendents Association, the Business and Labor Coalition of New York, and the New York Academy of Medicine.

AARP, in a memo supporting the legislation, stated that "safe and accessible roadways and sidewalks are a critical link in our transportation system and vitally important to access community services" and that the legislation would "bring more of a balance to our roads and make them safe for all users."

Tri-State Transportation Campaign, in a memo supporting the legislation, stated that "relatively small design and capital investments can result in significant safety improvements in our communities."

The legislation has been sent to the Assembly.
