Bill Also Provides for Mandate Relief

The New York State Senate today passed historic property tax relief legislation that enacts a cap on the growth of local property taxes.

The bill (S.5856), sponsored by Senate Majority Leader Dean G. Skelos, will cap school and local government taxes to less than two percent or the Consumer Price Index (CPI), whichever is lower. Mandate relief is also included, with \$127 million in savings to local governments, in addition to the creation of a Mandate Relief Council to identify and repeal unsound, unduly burdensome laws and regulations.

"I am very pleased we were able to come to an agreement on mandate relief and capping property taxes," said Senator Bill Larkin (R-C, Cornwall-on-Hudson).

"Taxpayers have been crying out for help in dealing with the heavy burden of New York's taxes and this legislation is the first step towards assisting local governments with state mandates and providing homeowners with a means to control a portion of their local spending," said Larkin.

This tax levy cap would shift the focus from total spending to the actual property taxes levied to support school district and local government expenses. The bill includes the following provisions:

- * This bill limits tax levy growth to the lesser of two percent or the annual increase in the CPI, other than the "Big 5" school districts of Buffalo, Rochester, Syracuse, Yonkers and New York City. Those are funded through city budgets.
- *€The exceptions for a tax levy above two percent or CPI are funds needed to support voter-approved capital expenditures, pensions, torts over five percent of the prior year's levy, and an override of the cap.
- *€This bill also allows the growth in the levy due to physical and quantitative change.
- *€A school district would be required to submit a tax levy proposition for approval by voters at the district's annual meeting on the 3rd Tuesday in May. If the proposed tax levy is within the district's tax levy limit, then a majority vote would be required for approval. If the proposed tax levy seeks to override the cap and exceeds the district's tax levy cap, the threshold required for approval would be 60 percent of the vote.
- * A school district that does not levy an amount up to the cap in any one year would be allowed to carry over unused tax levy capacity into future years. However, this carryover levy capacity cannot be used to increase its tax levy by more than an additional 1.5 percent above the cap in any single year.
- *€In the event a district's actual tax levy exceeds its authorized levy due to clerical or technical errors, the erroneous excess levy must be placed in reserve to offset the levy for the next school year.

The bill also provides for the same cap to apply to taxes levied by municipal governments. Local governments that do not levy an amount up to the cap in one year can rollover that amount up to 1.5 percent in the following year. Local boards

can exceed the cap with a 60 percent vote of the governing body. Exceptions include the pension and tort judgments in excess of five percent from the prior year's levy. When enacted, the law would take effect for the 2012-13 fiscal year.

In addition, the mandate relief component would provide real cost savings in the form of \$127 million in savings to local budgets. This includes:
