Hurricane Sandy Update – News, Closures & Important Links

ANDREW J LANZA October 29, 2012

| ISSUE: **HURRICANES**

With Hurricane Sandy underway, I wanted to provide you with some important information regarding conditions and closures in our area. Please also [visit my website](#), or find me on [Facebook](#) for the most up-to-date information regarding the storm. I will do my best to update these sites in real-time with the most recent information available.

>PUBLIC SCHOOLS WILL REMAIN CLOSED TOMORROW, OCT 30th

>MTA SERVICE SUSPENDED DUE TO HURRICANE SANDY

Service on the NYC Subway and bus network, Long Island Rail Road, Metro-North Railroad, and Staten Island Railway is suspended. Access-A-Ride service, including subscription service is suspended until further notice. The MTA began an orderly shutdown of commuter rail and subway service, as directed by Governor Andrew M. Cuomo, at 7:00 p.m. Sunday, October 28th. The decision to shut down the MTA network was made to protect customers, employees and equipment from the wrath of Hurricane Sandy as the strong storm continues its march up the east coast. This is only the second time the full network has been shut down preemptively in connection with a weather event.

Subway and rail road stations are closed and access to Penn Station has been restricted. Grand Central Terminal is closed.

The MTA Hurricane Plan calls for suspending service hours before the approach of winds of 39 mph and higher. That gives MTA crews time to prepare rail and subway cars, buses, tunnels, yards and buildings for the storm, then return to safety.

The duration of the service suspension is unknown, and there is no timetable for restoration. Service will be restored only when it is safe to do so, and after careful inspections of all equipment, tracks and other sub-systems. Even with minimal damage this is expected to be a lengthy process.

Customers and the media should monitor this website or call 511 for the most current service information.

> BRIDGE AND TUNNEL CLOSURES

The Holland and Hugh Carey (formerly the Brooklyn Battery) tunnels will be closed effective at 2:00 PM today, Oct. 29th.

Other closures will be determined on a case-by-case basis based on high winds, rainfall and roadway conditions.

In the event that wind speeds reach 60 MPH, the following bridges will be closed:

Robert F. Kennedy Bridge

Throgs Neck Bridge

Bronx-Whitestone Bridge

Verrazano-Narrows Bridge

Henry Hudson Bridge

Marine Parkway-Gil Hodges Memorial Bridge

Cross Bay Veterans Memorial Bridge

George Washington Bridge

Goethals Bridge

Bayonne Bridge

Outerbridge Crossing

Drivers should note that speeds will be restricted to 25 mph once winds reach 30 mph and access by trailers, motorcycles, vans, mini buses, and vehicles with unstable cargo will be prohibited when winds reach 50 mph. Some bridge restrictions are already in place.

Motorists are urged to drive at reduced speeds when roadways are wet, and pay close attention to posted electronic messages for important information.
