Long Island Green Homes Can Help You Reduce Your Energy Costs

PHIL BOYLE February 11, 2013

| ISSUE: **ENERGY**

The Long Island Green Homes Consortium is a cooperative effort of seven Long Island municipalities. The goal of the consortium is to reduce energy costs and usage by helping you get a comprehensive home energy audit and making cost effective energy upgrades to your home.

Programs are available to all Long Island homeowners, no matter what town, city or village you live in.
