Spraying Notification from Suffolk County Department of Health Services

JOHN J. FLANAGAN June 10, 2013

SUFFOLK COUNTY DEPARTMENT OF HEALTH SERVICES NEWS RELEASE

FOR IMMEDIATE RELEASE

The Suffolk County Department of Public Works' Division of Vector Control plans to treat parts of the following salt marshes by helicopter to control mosquito larvae. Should weather conditions prevent completion of the work, treatment will be continued on the next suitable day.

Time and date of the application: June 11, 2013, 5:00 AM- 8:00 PM

Method of application: Low altitude, large droplet liquid application

Name of Pesticide: Vectobac 12 AS (Bti)

Approximate location(s):

Pipes Neck Creek	
Pipes Cove	
Town of Smithtown	

The products used are registered by the United States Environmental Protection Agency and the New York State Department of Environmental Conservation and are applied in accordance with the required state and federal permits.

No precautions are recommended to prepare for this spraying, as the helicopter will be flying at a very low level over marsh areas and taking other precautions to control drift into inhabited areas. Human exposure from this operation is unlikely and the products involved have no significant human toxicity, according to an EPA assessment and Suffolk County's own risk assessment plan.
