

NEW YORK STATE SENATOR

Joseph E. Robach

Solid Cell, Inc. Awarded NYSERDA Grant

JOSEPH E. ROBACH November 22, 2011

| ISSUE: **ECONOMIC DEVELOPMENT, ENVIRONMENT, GOING GREEN**

On Tuesday, November 22nd, I had the opportunity to speak at a ceremony to announce a \$200,000 NYSERDA grant to Solid Cell, Inc for product development and manufacture of its proprietary modified planar solid oxide fuel cell technology. The grant specifically targets manufacture of the Company's patent-pending ceramic interconnect. Solid Cell was one of only a handful of companies selected under the highly competitive "Environmentally Preferred Power Systems Technologies" program. For more information on Solid Cell, visit their website at <http://solidcell.com/>.
