

NEW YORK STATE SENATOR

Joseph E. Robach

New SUNY College of Nanoscale Science & Engineering Facility

JOSEPH E. ROBACH July 17, 2013

| ISSUE: **ENERGY**

Today, I had the privilege of joining Lt. Governor Duffy and other local leaders in announcing that the SUNY College of Nanoscale Science & Engineering will be opening a solar manufacturing and technology development facility in the Town of Greece. SUNY CSNE will invest \$100 million in to this one-of-a-kind project by transforming an empty 57,000 square foot facility, formerly used by Kodak, and will create 100 jobs for our community.

This announcement continues to build on our communities long and proud history of being a leader of innovation and invention throughout New York State.
