

NEW YORK STATE SENATOR

Terry Gipson

With Senate and Assembly Colleagues urging a new impact study on fracking in NY

TERRY GIPSON July 24, 2013

I just stood with my Senate and Assembly Colleagues to urge a new impact study on fracking in NY since the group paid by the state to perform the study has direct ties to the pro-fracking lobby. To make such an important decision on fracking, the environment and economy we need truly independent information. There should be NO DOUBT.
