Region 9 (Sullivan, Delaware) 845-721-8116

Some of the most important tips for safe winter driving include:

- Never follow a snowplow too closely or attempt to pass one. Remember that the highway ahead of the plow is usually snow-covered;
- Adjust speed for road conditions and maintain a safe distance from other vehicles;
- Schedule extra time for winter travel and be patient during ice and snow removal operations;
- Assume that bridge surfaces are slippery, as they freeze more quickly than road surfaces;
- Be wary of black ice, which can be difficult to see but makes conditions slippery when pavement temperatures are below freezing;
- Have a cell phone handy, if possible, but do not text while driving; distracted driving is illegal and becomes even more dangerous during storm events;
- Never venture from your vehicle if snowbound;
- Equip your car with emergency supplies including sand, shovel, flares, booster cables, rope, ice scraper, portable radio, flashlight, blankets and extra warm clothes;
- Inform a responsible person of your destination, intended route, and estimated time of arrival; and

- Keep calm and do not panic in case of a vehicle breakdown, accident, or if you become snowbound.

Motorists should also include the following emergency items in their vehicles:

- Flashlight with extra batteries
- Charged cell phone and automobile charger
- Basic first-aid kit
- Blankets or sleeping bags
- Extra clothes, including rain gear, boots, mittens, and socks
- Windshield scraper and brush
- Fire extinguisher
- Shovel
- Sand, road salt and/or cat litter for traction
- Tire chains or traction mats
- Basic tool kit, including pliers, wrench, and screwdriver
- Tow rope
- Battery jumper cables
- Road flares/reflectors
- Brightly colored cloth (to use as a flag)
- Road maps
