The New York State Tri-Level Joint Legislative Task Force is charged with bringing the three layers of government together in a coordinated effort to help create jobs in the 21st century.

The Task Force represents a strategic opportunity to receive input from the public, private and not-for-profit sectors through public hearings, virtual broadcasts, and written testimony.

This vital information will then be compiled in a report to better determine what the local, state and federal governments can do to attract companies and facilitate entrepreneurship. We need to create jobs by showing that New York State is open for business!

In order to testify at this hearing, you must pre-register by e-mail at TRILEVELTASKFORCE@GMAIL.COM
