

Iris Jimenez

I'm a woman on a motorized wheelchair from NY who depends totally on home care and even since PPL came in to the picture my life has been very very very depressing. Already lost a PA and my long time PA wants to leave she's been with me for 25-26 and all because of PPL . I can't be left alone at all and I'm extremely afraid of that because I don't have family anymore. Since PPL came into my life all I do is cry twice three times a day. One thing I don't understand about the governor is that she keeps saying that she's all about people and family being together she's contradicting herself. I only wish that she can be in my place to see what she would do.

Thank you,
