

Environmental Awareness Month with Senator José M. Serrano

This month, our off-site constituent hours will focus on creating awareness about the small and large ways in which our communities can contribute to a more sustainable city and planet. We will be joined by GrowNYC and the New York State Department of Environmental Conservation who will be sharing information about the various services and programs available to anyone who is willing to become a better steward of the environment. In addition, we will be joined by the Tenant Support Unit of HRA during our East Harlem Constituent Hours to assist those who are at risk of becoming displaced.
