9:15 AM – 10:30 AM, Meeting Room 1

NYC has, historically, been home to thriving communities of working- and middle-class Black and Hispanic homeowners. Yet, the housing stability of these existing homeowners and their renters are still threatened by the legacy of the 2007 foreclosure crisis, predatory lending and wage stagnation. The hollowing out of New York City's middle class makes it hard to afford rising housing costs and seniors are particularly vulnerable. They often turn to reverse mortgages as a last resort to stay in their homes. Reverse mortgage foreclosure and deed theft are on the rise, and homeowners need tools to fight back.

This workshop will focus and examine the current state of Black and Hispanic homeownership in New York City and will discuss critical new legislation aimed at deterring flipping, protecting existing homeowners from foreclosures and scams and expanding new opportunities for affordable homeownership through Community Land Trusts and other reforms.
