

LEGISLATION

Through the office of State Senator Brian A. Benjamin, we draft legislative bills that benefit the young adult community and the community as a whole.

"Millennial Legislative Luncheon" Brainstorming Session

June 16, 2018

"The Millennial Legislative Luncheon was a think tank. It was an opportunity for young adults to provide thought leadership and strategic solutions to issues and concerns plaguing our generation. It was a chance to participate in solving our own problems and become involved in the political process. The event was a success, as we came out with some great proposals."

- **Eboni Mason, Task Force Next** Member

From these sessions, **the Task Force will write and propose bills that address issues that particularly affect young adults and potentially future generations**, as community-generated legislation is important to Senator Brian Benjamin because who knows what the community needs better than the community.
