

Ending pollution is a good way to help the Earth

April 22 is the best day.

Recycling is the right thing to do, you should do it!

Trees are needed for oxygen so, plant more!

Habitats are getting ruined because of waste.

Day light saving is better for the earth so, play with your toys or read a book instead of using electricity.

Air needs to get better because we can not live without it!

You need to save the Earth before it falls apart!

Save me!
I'm dying, there's
too much smoke
and wild fire!
