

Earth Day

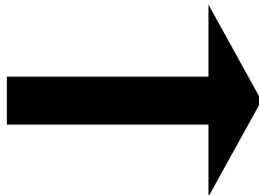

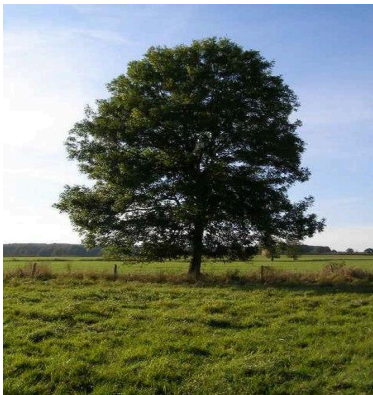

By: Emmylou

The earth is special because it will keep us and our children alive, like a mother, Mother Earth.

Breathe.

I also think the earth is important because it gives us things like trees that help us breathe.

But also this happens.

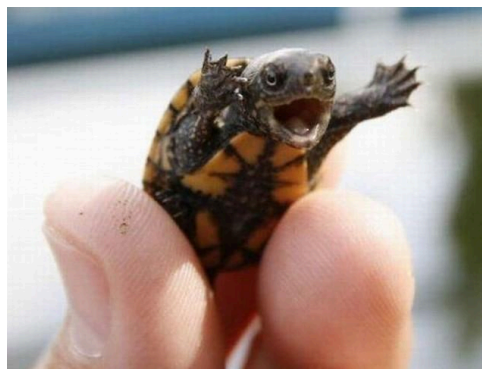

And these are found all over the world. Yes, it is very sad, not just for the earth, but for people too.

We also need to pay attention to what we throw away. Why? Because of all animals that could be in danger because of trash.

But if we pay attention to what we throw away, this is what will happen.

By the way, thank you for joining me. Bye!
