

Help save the Earth!!!

Authors: Gemma Acquilano and Morganne D'Angelo

There are many ways you can save the Earth today. You can save the earth by planting trees and other plants. Have fun picking up trash while taking a nice jog or walk. Do you see some cool Monarch butterflies? Well, their population is getting smaller. Research ways to help them. Plant some milkweed for the Monarchs. Love grocery shopping? Buy less packaging and buy less plastic. Even though there are many bad diseases, it is okay to have a mask. Just make sure it goes in the trash. Having many trash options makes less landfills. Next time you are in the car eating food and you throw it out the window- THINK FIRST! The food attracts animals to the road and they can get hurt. So please participate in Earth day this April.
