

Recycling and Waste

Reduction

By Luna Manalo

What is waste reduction?

Waste reduction involves anything that can reduce waste. Waste reduction prevents pollution and saves energy as well.

What is recycling?

Recycling is the process of transforming wasteful products into new things that you can use.

It's good to recycle because waste that you don't recycle could end up in the ocean and harm animals.

Recycling also transforms wasted products like cans, into new things that can help you or that you can use
