

# Protect the Earth

By Anthony Lanzarone

The Earth cries when you put fire to the trees  
but never treats us like how we treat the seas  
the seas are so dirty every day fish and more die from plastic  
that's why kind people try to clean the seas it works like magic

The Earth's trees give us oxygen to breath so why do people chop them  
The Earth is like a person that needs to be taken care of  
Since we pollute the Earth it causes global warming that kills polar bears  
So cleaning up the land and the oceans are so important

If we clean up the earth maybe we can stop melting the ice in antarctica  
And maybe the animals will stop dying and they will live  
If we protect the earth the earth will be happy as a fed baby  
And maybe just maybe if we clean the earth it will get better
