

# Earth Day

Slogan: Save the Earth, And the Future!

We could invest into more advanced recycling facilities, and use advanced technology to make recycling more effective.

Use the 3 R's (Reduce, Reuse, Recycle) to conserve resources, minimize waste, etc to keep a healthy environment, for our home.

Instead of using our everyday items like plastic straws, plastic bags, etc, we can try using reusable bags, reusable water bottles, etc. Just about anything to cut down on our use of plastic

We could also increase the public awareness on proper recycling, and on why it's important to reduce waste

SAVE  
THE  
EARTH
