

Short Earth Poem

This is the Earth where you were birthed
keep it real clean the cleanest you've
seen. Recycle your trash, don't throw
and dash. You're just cleaning up it doesn't
cost any cash. Let's all work together
let's all work hard, this is the
Earth let's not bombard.

Short Earth story (Ruining)

The Earth is in danger, pollution
is ruining our night time stars. We are
starting to have hotter temperatures in
the middle of winter. Plastic and littering
is ruining our ocean and killing all types
of fish and sea animals. More and more
animals are getting endangered. We need to
stop killing animals, recycle our trash,
and help stop pollution by not going on jets
and not letting the core heat for too long.

Recycle

no

Littering

yes

Pollution

no
