## FIELD & FORK NETWORK

*We connect communities to innovative solutions that foster a sustainable food system.*

### **Introduction**

Thank you for allowing me to submit testimony on behalf of Field & Fork Network and our nutrition incentive program Double Up Food Bucks NY (Double Up). My name is Lisa French. I am the Co-founder and Executive Director of Field & Fork Network, a statewide non-profit organization dedicated to building a thriving regional food system that serves all New Yorkers. Double Up Food Bucks NY is a program that matches Supplemental Nutrition Assistance Program (SNAP) benefits \$1 for \$1 on local fresh fruits and vegetables, helping increase healthy food access for New Yorkers.

**Today those receiving emergency allotments of SNAP benefits ends. This will impact close to 3 million New Yorkers who have come to rely on these benefits to feed themselves and their families. This could not happen at a worse time when inflation is impacting the cost of basic foodstuffs at historic rates. According to a recent report from the NY Health Foundation, those experiencing food insecurity are twice as likely to have unsatisfactory health and often will skip medical care so they can afford food. As the wealthiest country in the world, this is an unconscionable choice our citizens have to make.**

Both hunger and food insecurity are prevalent problems in communities across this great state. Food is vital to the health and well-being of all New Yorkers. Poor diet is a leading contributor to death and chronic disease in New York State (NYS). Having a poor diet ranks as the number one cause for cardiovascular disease and is a major risk factor for obesity. Obesity increases risk for serious health conditions such as type 2 diabetes, heart disease, stroke, arthritis and some cancers. Unfortunately, most of New York State's population is impacted by obesity and related non-communicable diseases.

The burden of these chronic health conditions is not distributed equitably. In NYS, obesity is more common among blacks and Latinos, people without a college education, and those living in households earning less than \$50,000/year. Diets that include nutrient-rich foods, such as fresh fruits and vegetables, can prevent weight gain and help control cholesterol levels and blood pressure. According to the Gretchen Swanson Center for Nutrition, nutrition incentive programs like Double Up Food Bucks can help to close the nutrition gap among low-income populations by increasing purchasing power and access to fresh fruits and vegetables.

I understand one of your goals as state leaders is to ensure that no New Yorker goes hungry while also helping families who are facing hard financial times to move out of poverty. You

understand the cost of hunger and the toll that diet-related health conditions take on individuals and the lost economic productivity it represents.

### **The Multiple Wins of Double Up Food Bucks, New York State Impact**

Our experience implementing Double Up Food Bucks NY has shown that matching SNAP benefits with incentives for locally and regionally grown fruits and vegetables is a cost-effective way to simultaneously reduce hunger, improve dietary health, and stimulate local food economies in a way that can create new job opportunities. Through this one intervention, we can meet immediate caloric needs and build a healthy population.

Since 2014, we have seen significant impact with the Double Up program:

- Served more than 100,000 SNAP recipients
- \$9.4 Million in sales of healthy food in SNAP and Double Up, supporting local farmers and businesses
- More than 3.7 million lbs. of healthy food purchased and consumed
- Over 400 NYS farmers directly benefit from the program as participating market vendors and wholesale produce suppliers

Our most recent program evaluation shows that 96% of Double Up customers surveyed say they increased the amount of produce they consume because of the program, and 92% of Double Up shoppers reported that they are buying more fruits and vegetables for snacks since using the program. 80% of Double Up shoppers said they are buying fewer potato chips, candy, and cookies for snacks. At farmers markets, we find that SNAP customers are maximizing the full potential of the program—redemption rates top over 90 percent. Many SNAP shoppers report that NYS produce in the markets is less expensive and of higher quality than where they usually shop, and that the selection is better. Farmers and market managers also tell us that customers that come to the markets for the first time to take advantage of the Double Up program continue to shop at the markets when they are no longer using the SNAP program.

This is all important feedback. This tells us that Double Up participants are motivated shoppers who take nutrition and health seriously and work hard to get the best nutritional value for their very limited food dollars. It also indicates that new, healthy shopping habits that form as a result of the Double Up program continue when families leave the SNAP program.

## FIELD & FORK NETWORK

*We connect communities to innovative solutions that foster a sustainable food system.*

Today, the program operates in 29 upstate NY counties with plans to double that number over the next 4 years. The range of food retail venues in which Double Up operates is broad and growing. We have expanded the program footprint to include farmers markets, farm stands, mobile markets, small retail, and grocery stores all in communities that have SNAP recipients. Federal and private funding has allowed us to implement the program using innovative technology solutions that are safe, secure, and convenient for the Double Up shopper. We are also expanding into large retail grocery stores such as Tops Markets and Price Chopper to meet more SNAP shoppers where they are and improve equity and reach of the program.

We all know that changing dietary patterns takes time and that new healthy food cultures are forged through a combination of approaches. That's why we have built strong partnerships with over 200+ organizations and agencies in communities across New York and the US that work to serve our most vulnerable populations in ways that aim to improve their lifestyles, health, and economic future.

Double Up Food Bucks NY is a proven, innovative model that simultaneously delivers health and economic opportunity. This unique feature of the nutrition incentive program has garnered unparalleled support from private and corporate philanthropy and federal agencies. But that is not enough. For nutrition incentive programs to be sustainable, state support is critical. We were thankful to receive \$2 million in the 2022-2023 NYS budget and are hoping to build upon this relationship. More than 13 states currently support nutrition incentive programs with annual budget appropriations of up to \$20 million per year since as far back as 2016, recognizing the significant impact Double Up Food Bucks has in communities. These states include Massachusetts, California, Ohio, Michigan, Wisconsin and many others.

### **Conclusion**

We know that there is no silver bullet that will solve our hunger and health challenges. However, the state can continue to invest in Double Up Food Bucks NY with its proven positive impact on those in need.

- **We ask the leaders of New York State to *continue* its investment in Double Up Food Bucks NY. With inflation and food prices at an all-time high and the impending reduction**

## FIELD & FORK NETWORK

*We connect communities to innovative solutions that foster a sustainable food system.*

**in SNAP benefits, the needs of food insecure New Yorkers has never been greater.** With matching federal dollars available, the return on investment is an immediate reduction in hunger, increase in produce consumption, and greater farmer income.

- **Our experience with Double Up Food Bucks NY demonstrates the power of healthy food incentives. They work.** By collaborating across disciplines, we can integrate healthy local produce into an existing federal nutrition program and create benefits on multiple fronts simultaneously.
- **The positive and immediate impact of nutrition incentives is an opportunity to help all New Yorkers thrive.** The standardized model of Double Up Food Bucks and the ability to successfully implement the program in diverse food retail outlets, makes it a unique program that has the power enhance the value of the SNAP program and build healthier food environments and a more viable and responsive food system.

**We ask the Committee to please support a \$4 Million budget appropriation for Double Up Food Bucks NY.** This will ensure New Yorkers get the food and nutrition they need to live healthy and productive lives. A \$4 Million appropriation to Double Up would help grow Double Up across New York State's communities, ensuring everybody in need can access fresh fruits and vegetables.
