Dear Municipal Leaders,

New York State offers a multitude of grant opportunities for local governments.

For example, there are grants to assist municipalities with improving infrastructure, building resiliency and protecting the environment, supporting area businesses and growing jobs, and implementing shared service agreements that result in significant cost savings for taxpayers.

As a former Town Supervisor, I know navigating these programs can be challenging and time consuming. I also know how helpful grant funding can be to a community. That is why my office created this resource guide.

Our "Local Government Grant Guide" is intended to help you and your team identify programs that may be beneficial to our shared communities.

While the primary focus of this guide is NYS-based grants, we have included information on a few private programs as well. And I encourage you to reach out to your federal representatives for information on national programs.

Should you decide to apply for a grant, please let me know if you would like my office to provide a letter of support.

In the meantime, I will continue to provide you, via email, with regular updates on funding opportunities.

As always, I thank you for your public service and your partnership. It is both a pleasure and privilege to work with you.

Excelsior!

Ralph C. Wilson Jr. Foundation

The Ralph C. Wilson Jr. Foundation has four key areas of focused investment:

Active Lifestyles: By supporting access to safe spaces and programs that get kids physically active and moving, the Foundation aims to introduce lifelong healthy habits through its Youth Sports & Recreation grantmaking. Spanning all generations, the Foundation's investments in Parks, Trails & Green Design looks to connect people and communities to each other, nature and recreation.

Preparing for Success: Strong work ethic, confidence and a desire to learn are attributes that can be instilled at a young age and carried through adulthood. The Preparing for Success focus area is centered on providing the communication, teamwork and critical-thinking skills people need to grow and adapt throughout their life and career.

Caregivers: There are more than 40 million family members - spouses, daughters, sons, grandchildren - and friends in the United States caring for older adults, a number that will grow dramatically in the coming years. The Foundation aims to elevate caregivers' critical roles by highlighting the often hidden value and contributions they make to families and communities every day.

Entrepreneurship and Economic Development: Several years into recovery after a decades-long economic slide in both Southeast Michigan and Western New York, the Foundation's investments in Entrepreneurship and Economic Development look to leverage this momentum by spurring small business growth, place-based community and economic development, and talent attraction and retention.

Deadline: Rolling
