

HELP SAVE THE LIFE OF A LOVED ONE!

LEARN:

- The signs of an opiate overdose;
- How to reverse an opiate overdose;
- About new treatment approaches.

Every day, at least one Long Islander dies from an opiate overdose. And those are only the ones we know of - the ones directly caused by Heroin or prescription painkillers such as Percoset or Oxycodone.

About 7 out of 10, died at home.

If you don't think it can happen to someone you care about, please think again. Overdoses can happen to anyone.

We will give you for FREE, the overdose reversal agent, Naloxone - and we'll show you how and when to use it. We'll also tell you about Nassau's newest and effective treatment approaches - including injectable, extended-release Naltrexone; and integrated care.

DON'T MISS A CHANCE TO SAVE A LIFE.

Tuesday January 30th, 2018 • 7pm-9pm

Lawrence Road Middle School

50 Lawrence Road, Hempstead

General Purpose Room
