Energy Efficiency

Save Money

Improve the Efficiency of Your Home

Ensure a Cleaner Environment

Energy Saving Tips

- ◆ **Energy Star Light Bulbs** – Replace 5 standard bulbs with Compact Florescent (CFL) bulbs. Save about **\$100/year**.
- ◆ **Phantom Load on Home Electronics** – Unplug chargers, laptops & video games when not in use. Or use power strips/SmartStrips to control multiple devices at once. Save about **\$50/year**.
- ◆ **Thermostat** – Very powerful tool. Don't heat (or cool) at the same level when sleeping or away. **6 – 8 degree adjustment, save \$5-\$10/month** on heating and cooling bills. Try a programmable T-Stat.
- ◆ **Furnace and A/C Filters** – Change or clean filters every month for clean air, lower energy costs and extended life of your equipment, save **\$45/year**.
- ◆ **Laundry** – Wash clothes in cold water. Save about **\$90/year**.
- ◆ **ENERGY STAR® Appliances** – Use 40% less energy than conventional models sold before 2001. Upgrade old appliances and save **\$75/yr**.
- ◆ **Air Sealing** – Caulk & weather strip doors/windows. Insulate walls, attics and basement – save **\$150/year**.
 - ❖ *Remember, savings will vary significantly from home to home. Data based on 500 kwh monthly residential usage.*

Low Cost / No Cost Tips

- ◆ Insulate outlets & light switches
- ◆ Use blinds and drapes to stay warm in the winter and cool in the summer
- ◆ Install low-flow faucets and showerheads to save on hot water heating costs
- ◆ Make sure heating vents and air conditioners are not blocked by furniture, drapes or other objects
- ◆ Space heaters and electric blankets – Don't leave them on when not in use.

High-Efficiency Heating Rebates

- ◆ Equipment Rebates
 - Furnaces & Boilers: **\$140 - \$560**, depending on the type/efficiency
 - Hot Water Heaters: **\$100 - \$450**
 - Programmable T-Stats: **\$25**
- ◆ Contractor installed
- ◆ Complete rebate form and include a copy of the contractor invoice.
- ◆ Save up to 30% on heating costs

Toll Free: 877-316-9491
