

July 30, 2020

It's easy to lump all the seniors in Nursing Homes into one category and forget that they are individuals who are being subject to insane regulations under the guise of protecting them.

My mother can't see her 4 children. She can't walk beyond the floor that she lives on! She missed all of spring and might miss summer. She literally has not breathed fresh air in over 5 months.

On her floor she has been exposed to at least 4 people with Covid, yet we are the greater risk to her?!

Masks, gloves, limited time, outdoors - these are rational rules for visitation. Leaving people with dementia to rot is cruel and inhumane! How many more months must she and others suffer?

Please help us.

Best,

Rachel Yohai

Mother to Miriam Zagoory
