

Reduce, Reuse, Recycle!

* Recycle bottles!

* Water is needed so maybe instead of using plastic bottles everyday you should use reusable bottles.
(Fact: some recycled bottles go into the landfill!)

* You should ride a bike to work instead of causing pollution by riding a car. Plus you can also get exercise! It's a win-win!

* If you have toys in good condition, donate it or try to give them to a younger kid so we won't make more trash!

* Try to use it for a project! You can use it to build things. Be creative!
