

RECYCLE

Hmm...

Separate waste from recyclable items

You can go even further than recycling
You can ...

Compost

Trash

compost can be made into soil Byworms

non Reusable

Reusable Bin

Help the environment by using reusable bags, bottles and more

Reuse

Do recycle your water bottles cans and others with this sign

others can + fit into these two categories

Composting is when you take , for instance, banana peels, apple cores, and dead leaves and put them in a certian bin or pile add worms and you have your own compost pile after a couple months take the bottom out andnd you have dirt!
