

Help Save the Earth!!!

Reduce: Turn off electricity when you don't need it. Buy only the amount of food that's necessary.

Biking is healthier for

you & the planet

Recycle: Don't thoughtlessly throw away an items that can help make the world just a bit better. Plastic bottles, paper, cardboard, glass. They can all be recycled.

Don't waste water you don't need.

Turn it off at any time it's un-necessary.

Reuse: Whenever you're about to throw away something, think about its uses. If you can use it, then reuse it.

Deforestation is also a major problem. Billions of trees are cut down for paper each year. Doing this harms the environment even more.
