

The Three R's

All the pollution around,
Making the world seem so down
We can make the world bright again
But how?

Reuse, Reduce, and Recycle
Are the heroes we need for this job
I will tell you how because might be saying
But How?

Reuse is just like it sounds,
It means to reuse things
There is no sadness to carry,
Just use over and over again

Reduce is just like a twin to reuse
Except that it means to reduce the
Stuff we use
There's nothing to hate, just limit the stuff
You use every-day.

Recycle is a little bit different
Although it is a part of the Triplets

It means to not throw everything into the trash
Recycle what can be reused

There are lots of ways to protect the Earth
Like charity in fact, and planting trees too
We can protect our environment
And at the same time, be happy too!
