

Recycling
save energy
Recycling saves
energy by keeping
the materials because
when you make
plastic and metal
you use energy

if we don't save energy we
could not have the bunny which would
kill the plants of the food chain

Saving energy
will save
our earth
and will
save animals
and if you use
a light bulb when
you're not home
you're wasting a
lot of energy and you
be biking for 22 days

Angus McLean

this shows how the earth
will look if we don't save
energy
